

A photograph of two women in a professional setting. One woman, older with short blonde hair and glasses, stands and looks at a laptop. The other woman, younger with long brown hair, sits at the desk and looks at the laptop. In the background, there is a whiteboard with several sticky notes and a large potted plant.

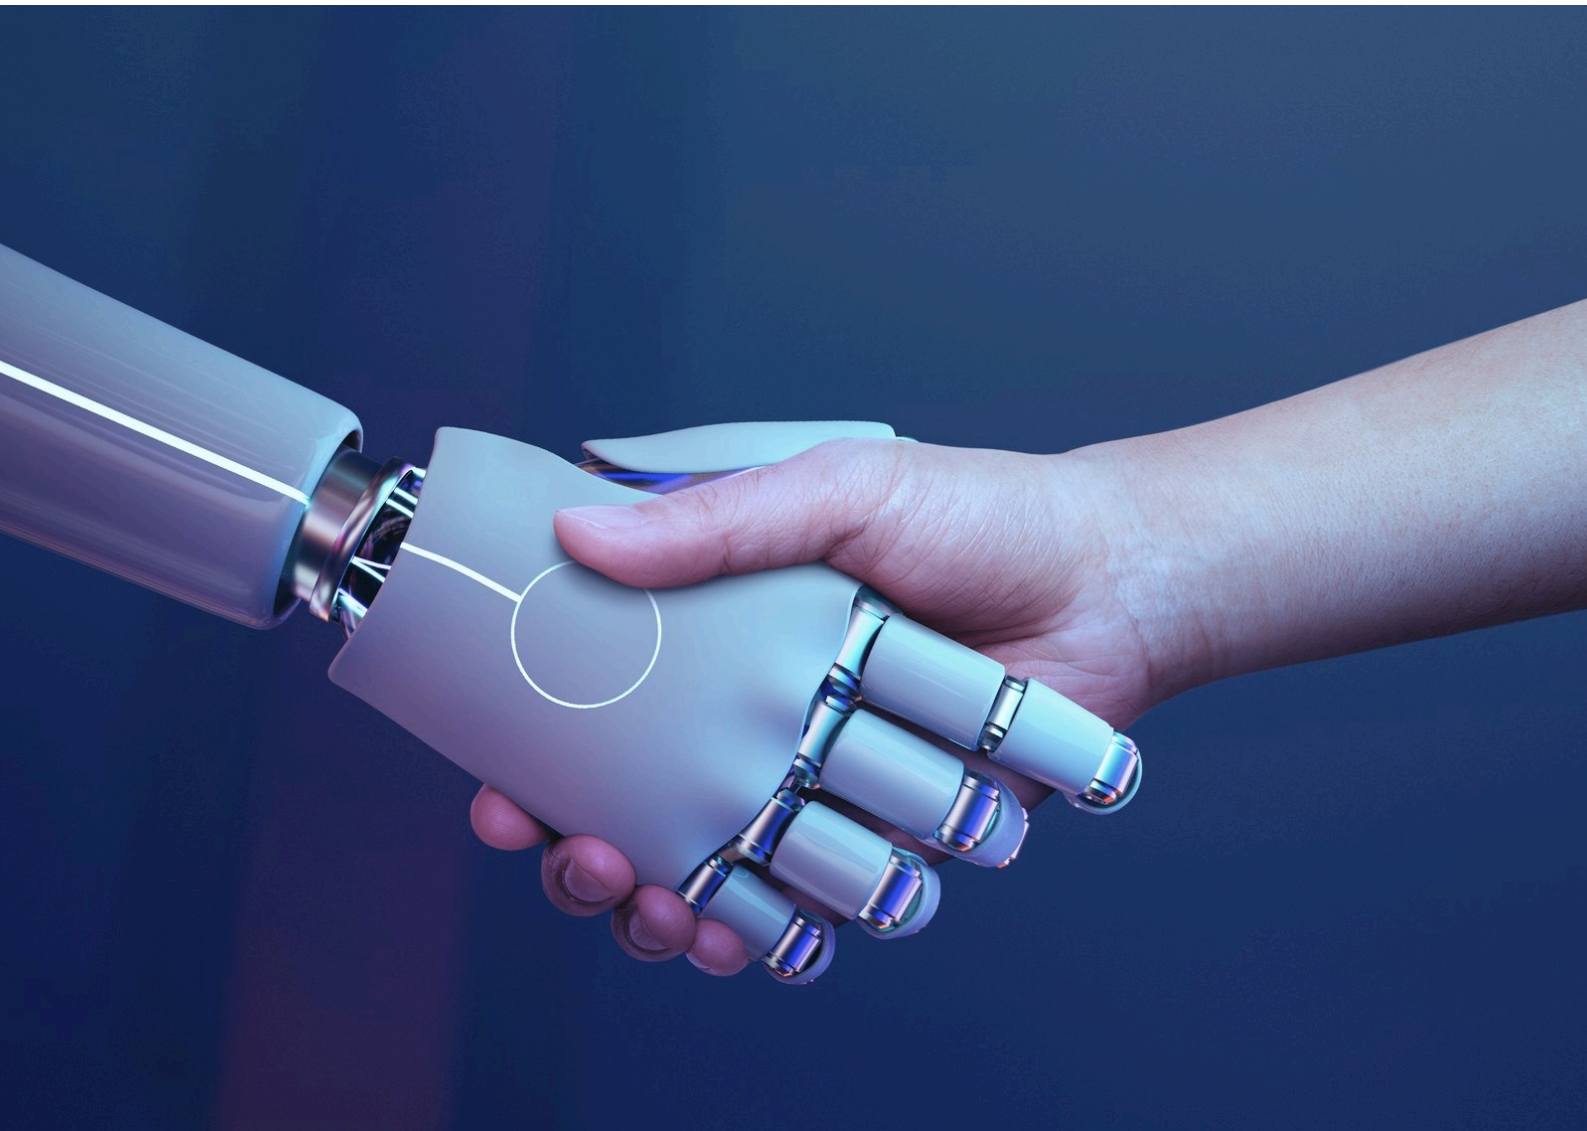

Transcription Proofreading Services

Where human expertise meets AI-generated content for unparalleled accuracy.

Harness the Power of Human Expertise to Refine AI-Generated Content

While AI-generated transcripts can greatly streamline workflows, they alone cannot deliver the exceptional quality your organization demands. Recognizing this need early on, GoTranscript pioneered AI content proofreading—blending advanced technology with human insight to achieve best-in-class results. Our expert in-house and freelance editors, spanning more than 60 countries, ensure that every transcript meets rigorous standards of accuracy, clarity, and consistency, no matter the language or industry.

From aligning AI-generated or third-party drafts to delivering polished, publication-ready copy, our end-to-end approach provides the precision and reliability you need for effective global communication. Whether your project is large or small, GoTranscript offers the expertise, scalability, and speed to handle it seamlessly. Don't leave the final touch to chance—our specialized human editors guarantee your message is delivered accurately, every time.

”

We were looking for an API-driven human transcription service and came across GoTranscript in a web search. We use the service in English and Spanish exclusively as a benchmark to help us measure the quality of other machine learning transcription solutions and increase the quality of our products

What We Offer

GoTranscript delivers **Transcription Proofreading Services** designed for precision, efficiency, and scalability—especially for enterprises and high-volume needs. Whether you have existing AI-generated transcripts or require an end-to-end solution (AI transcript creation + human proofreading), our expert editors ensure unmatched accuracy and security.

Key offerings include:

- **Standard & Specialized Transcription**
Need full human transcription or subject-matter expertise (legal, medical, financial, academic)? We've got you covered.
- **AI Transcript Proofreading**
Human editors refine automated transcripts to correct spelling, grammar, formatting, and terminology—achieving up to 99.4% accuracy.
- **Third-Party Transcript Enhancement**
Have transcripts from another vendor? We upgrade them for clarity, consistency, and accuracy.
- **Custom Solutions & Enterprise-Scale Projects**
Large volumes, rapid turnarounds, specialized style guides—whatever your requirement, we have flexible workflows to match.
- **Proofreading API**
Integrate our services directly into your platform for automated, high-volume processing with human-level accuracy. Our system can handle thousands of files per day.
- **Time-Coded Proofreading**
Perfect for subtitling, closed captioning, or any scenario requiring precise time stamps.

Why Choose GoTranscript AI Transcription Proofreading Services?

We offer an extensive pool of professional editors who specialize in reviewing and polishing AI-generated transcripts. The industry and subject-matter expertise of our in-house proofreading team ensures consistency, efficiency, and knowledge retention across every project. For additional flexibility and scalability, we also maintain a global network of qualified freelancers who can adapt to unique client requirements.

Native speakers of your target language guarantee that every subtlety and nuance is accurately captured, ensuring your transcripts resonate with local audiences. Throughout the entire process, we collaborate closely with you to employ best practices—maximizing both quality and efficiency.

Ideal Use Cases for AI Transcription Proofreading

- **AI-Generated Drafts**

When automated speech-to-text engines produce raw transcripts that require human refinement for near-perfect accuracy.

- **Bulk Corporate Projects**

Perfect for organizations managing large volumes of audio/video content (e.g., compliance archives, media libraries, or employee training).

- **Academic Research**

Universities and think tanks benefit from precise transcripts of lectures, interviews, and seminars—crucial for robust research and publication.

- **Media & Entertainment**

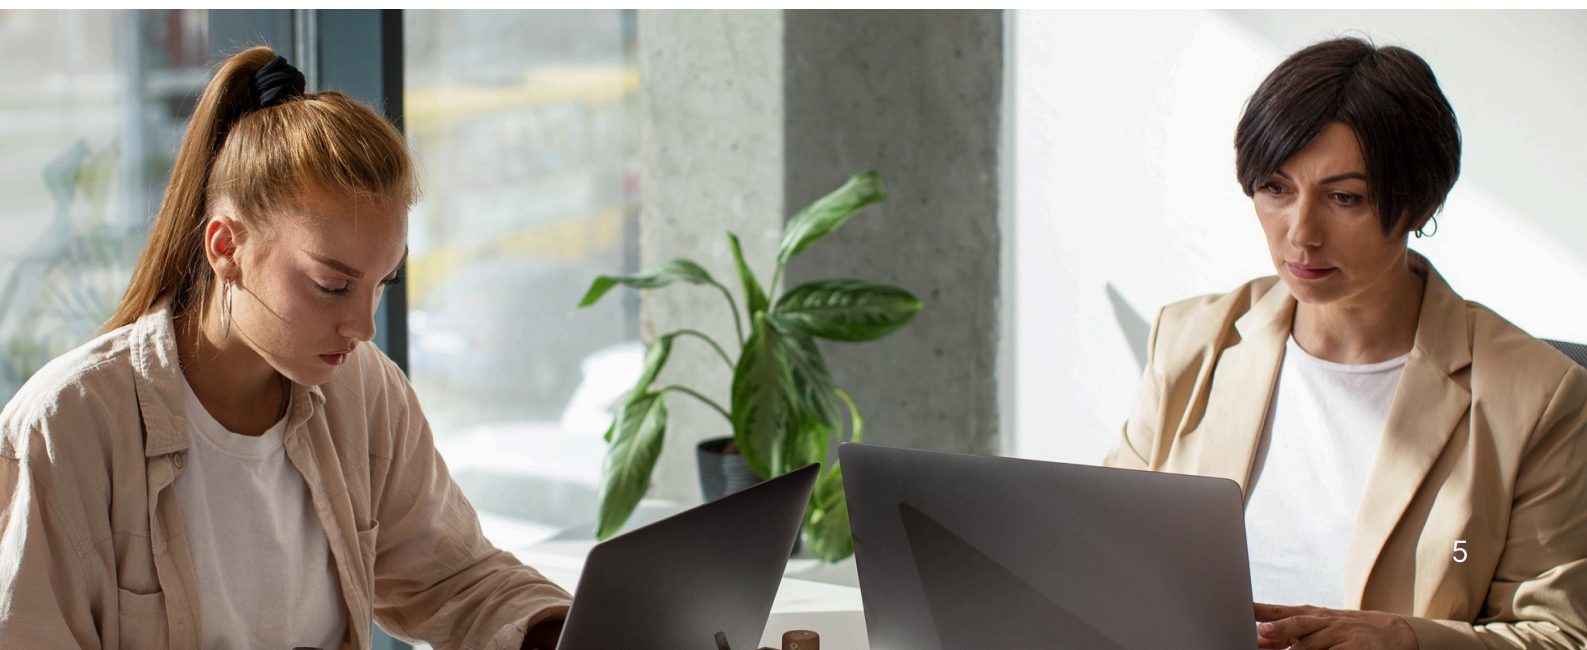

Production houses, broadcasters, and content creators rely on fast, accurate transcripts for subtitles, captions, and editorial workflows.

- **AI Content Post-Editing and Labeling**

Beyond transcription, our experts refine AI-generated text to ensure consistent style, clarity, and proper labeling—ideal for machine learning or analytics.

- **Third-Party Transcripts**

Enhance or correct transcripts from outside providers to ensure consistency and high-quality final outputs.

Technology-Enabled Services to Improve Efficiency

At GoTranscript, we've built our **transcription and proofreading platform** entirely from the ground up. By avoiding third-party integrations, we minimize costs and safeguard against potential security vulnerabilities. This end-to-end control streamlines our workflows, enabling us to deliver consistently accurate results on tighter timelines.

Our custom-built system supports high-volume proofreading requests—turning around thousands of AI-generated transcripts daily. Integrated analytics let us monitor performance in real time, continually refining our processes for maximum efficiency.

Integrated Quality Assurance and Management

No one wants to receive complaints about inaccurate or poorly polished transcripts, which is why we integrate quality assurance from start to finish. Our seasoned editors excel at verifying terminology, speaker labels, punctuation, and context—ensuring every final document meets the highest standards of clarity and precision.

Our robust Quality Management System (QMS) governs each stage of the proofreading process: real-time monitoring, immediate feedback, and continuous improvement. For clients requiring extra oversight, we provide a **two-stage** editing and review procedure, guaranteeing absolute accuracy and peace of mind.

Unparalleled Scale, Whatever Your Proofreading Needs

Whether your proofreading requirements are predictable, sudden, consistent, or sporadic, GoTranscript can seamlessly scale to meet them. We combine a technology-driven workflow with a vast global network of skilled editors, ensuring high-quality results on projects of any size or urgency.

This unique blend of resources and agility allows us to provide the breadth of services you need—so you can always count on GoTranscript to deliver top-tier proofreading at any scale.

A Wealth of Experience, Trust, and Reliability

Founded in 2005, GoTranscript has evolved into a leading provider of AI-augmented proofreading solutions. Trusted by more than 2,000 universities worldwide and partnered with numerous Fortune 500 companies, we've proven our unwavering commitment to quality, reliability, and transparency.

Our straightforward, predictable pricing applies whether you're refining a few transcripts or thousands. We also offer dashboards and reporting to track costs and key performance indicators (KPIs) against service level agreements (SLAs). Thanks to our proven track record, you can trust GoTranscript to meet your AI proofreading needs with unmatched accuracy and dependability.

How to Get Started: Self-Service or API Integration

Self-Service Testing

1. Create/Log In to Your Account:

Begin by setting up an account on GoTranscript or signing in to an existing one.

2. Submit a Test Order:

Upload both your audio/video file and its corresponding transcript, then select "Proofreading." Experience our quality and turnaround firsthand.

3. Scale as Needed:

Once satisfied, you can continue ordering at your own pace—or connect with our enterprise team for customized solutions.

API Integration Made Easy

1. Obtain Your API Key:

Retrieve a unique key directly from your GoTranscript account.

2. Streamlined Workflow:

Our developer-friendly endpoints let you submit AI-generated transcripts and automatically retrieve proofread versions.

3. Tailored Solutions & Support:

Need more flexibility? Our expert developers offer guidance every step of the way, ensuring a smooth setup in just days. For larger or specialized needs, contact our enterprise support to explore fully custom integrations.
